DETAILED ACTION

Applicant's response of 3/11/02 has been considered with the following results.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
1. Claims 1,3-11,13-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Miyamoto et al.

Applicant's attention is drawn to col. 2 lines 7 to col. 16 line 2. This document describes a zonal optical disc, which has the appropriate wobbled groove. The limitations of the above claims are considered self-evident.

Response to Arguments

2. Applicant's arguments filed 3/11/02 have been fully considered but they are not persuasive. In particular, it is noted that the claims are drawn to a product, not to a method of recording/reproducing.

Art Unit: 2651

Also, the cited passage in the primary reference refers to a prior art system, not the system of the primary reference.

As far as the examiner can ascertain from the claimed subject matter and the primary reference, the claims are anticipated because the claims are drawn to a stepped – zoned CAV system, which is what the primary reference is.

3. Claims 19-20 and 2 and 12 rejected under 35 U.S.C. 103(a) as being unpatentable over Miyamoto et al as applied to claims 1 and 10 above, and further in view of Aoki.

Although the Miyamoto et al reference discloses the ability of having address information modulated with the wobble, or to wobble the groove appropriately, the BPSK modulation format is not clearly depicted.

Aoki teaches the use of such a format in this environment for the inherent benefits thereof.

It would have been obvious to one of ordinary skill in the art to modify the base reference of Miyamoto et al with the teaching(s) from Aoki, motivation being to provide for increase signal density as stated in Aoki.

Conclusion

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art to Maeda ('828), Kobayashi et al ('281), Yamagami et al ('282), Nagasawa ('021), and Maegawa et al ('018) all describe both CAV and ZCAV systems with the wobbled tracks limitations and any could be used in place of the primary reference to Miyamoto et al..

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
